

## *Non-SDG&E Contractor Incident Alert*

**ACTIVITY:** Crew was working on a solar project.

**INCIDENT SUMMARY:** A local flagging contractor experienced a terrible incident where a random stranger driving by the jobsite offered two flaggers bottled water due to the high heat temperatures. Apparently, the water bottles given to the flaggers were laced with Fentanyl.

**STATUS:** Sadly, one of the flaggers died and the other is in critical condition after ingesting the water.

**POTENTIAL MITIGATION(S):**

- Provide the entire crew with an adequate amount of water and shade options, especially when the temperatures are high.
- Advise employees to not accept any outside liquids, food, or any other items from strangers to ensure their own safety from outside hazards or contaminants.
