THE PLATFORM BUILT FOR THE FUTURE OF WATER QUALITY

120Water™

Guiding utilities, state agencies, and communities through uncharted waters.

Water quality professionals are facing uncharted waters more often than ever before. With more data, more technology, and more regulations hitting the industry every day, there's always something new they need to navigate to stay compliant and keep their drinking water safe. **120Water is the only digital water quality platform built to help government agencies, water systems, and facilities manage and work together for safer drinking water.**

Where Data, Trust, and Expertise Come Together

SINGLE SOURCE OF TRUTH
Centralize all your water quality data in one platform to drive smarter decisions, efficient programs, and confident compliance.

ENHANCED PUBLIC TRUST
Engage your community with timely, transparent products and communications that build trust and meet regulatory requirements.

GUIDANCE YOU CAN RELY ON
Lean on our team of regulatory experts to help navigate complex rules and requirements to keep your programs running smoothly.
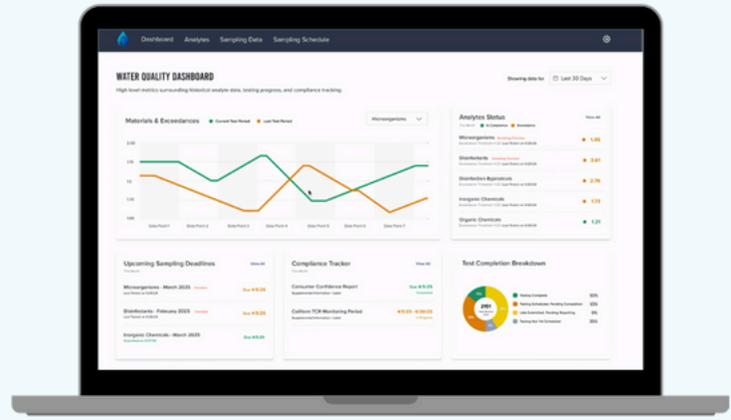

All Your Water Quality Needs. One Powerful Platform.

Our solutions scale with you, adapting to new regulations and growing program needs without reinventing your process every time. While the Lead and Copper Rule sparked our mission, 120Water supports thousands of systems tackling a broad range of water quality and compliance programs such as:

- Water Quality Data Management
- Verification & Replacement
- Community Outreach & Communications
- PFAS Sampling
- Customer Request & Post Wildfire Sampling

- School & Daycare Sampling
- Pitcher Filter Kits
- Inventory Submissions
- Sample Scheduling & Compliance Calendar
- LCR Sampling

Powering Smarter Water Programs

120Water delivers the software, services, and products you need to plan, execute, and report on water quality programs in one integrated solution.

- **SOFTWARE:** Centralized, secure, and configurable for every user. Our solution makes your programs more efficient and impactful.

- **SERVICES:** Expert-led program management for water quality sampling, LCRI compliance, resident outreach, service line replacement planning, and more.

- **PRODUCTS:** Pre-built letters, postcards, customizable sample kits, pitcher/filter remediation kits, and supplies shipped at scale.

What Sets 120Water Apart

We're built for water.
While spreadsheets and GIS platforms serve a purpose, they weren't designed to manage compliance challenges like LCRI and PFAS. We were.

We integrate, not replace.
With API and GIS compatibility, our platform works with your existing systems with no heavy lift required.

We're partners, not just providers.
From strategy to execution, our services team becomes part of your team.

We make complex programs easier to run.
With automated workflows and built-in logic, you spend less time sorting through details and more time making progress.

We've done this before.
We've helped 7,000+ water systems, facilities, and agencies manage programs and stay in compliance.
